

OnTrack Core Fund Note 23-01-03

Prepared by Lee Harris on 1/03/2023. Data from 12/30/2022.

SYMBOL (OTRFX/OTRGX)

The end-of-year rally in the stock market failed to materialize and the S&P 500 dropped 5.90% in the month of December to finish the year down 19.44%. Defensive sectors such as consumer staples, healthcare, and utilities have outperformed, which does not bode well for the stock market in the short-term. New lows could be made in 2023 if the recession predicted by most analysts is deeper than expected or if the Fed is forced to raise interest higher than expected in their fight to bring inflation under control.

The Importance of Capital Preservation

Capital preservation is important to long-term success in the market. Risk management is essential because it is hard to make up losses in the stock market, as can be seen in the following table:

Amount of decline	Gain required just to breakeven
8%	9%
25%	33%
50%	100%
75%	300%
90%	900%

For instance, a \$100,000 account that declines by 50% would have \$50,000 remaining in the account. The portfolio would have to make 100% on the remaining \$50,000 to get back to the original \$100,000. Markets can and do decline by large amounts. The S&P 500 index declined 56.78% from October 9, 2007 to March 9, 2009. The Nasdaq 100 index comprised primarily of technology stocks dropped 82.85% when the technology bubble burst from March 10, 2000 to October 7, 2002. The S&P 500 Index had a drawdown of 25.25% at one point last year, and it is not yet clear that the final low is in for the current bear market. It is important for investors to take steps to minimize losses in their portfolios during market declines.

Another way to look at risk is through the following question: Would you rather experience a 1 year gain of 80% followed by a one year loss of 50%, or have a return both years of 5%? Answer: The first scenario produces a loss while the second scenario results in gains.

Our goal in the OnTrack Core Fund is to manage risk so investors avoid the life-changing losses often experienced in bear market declines. The OnTrack Core Fund is defensively positioned, but we are prepared to take a more aggressive posture if market conditions improve as new trends develop in the new year.

Any performance quotes represent past performance. Past performance does not guarantee future results. Investment return and principal will fluctuate, so that shares, when redeemed may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted and assumes the reinvestment of any dividend and capital gains distributions

The contents of this OnTrack Core Fund Note do not constitute an offer to sell or a solicitation to buy a security, and are not an offer to provide any specific investment advice. Securities held in the OnTrack Core Fund are subject to change without notice. To obtain performance current to the most recent month end, please call toll free 855-747-9555 or access www.advisorspreferred.com. Disclosures

Objective: The OnTrack Core Fund seeks total return while keeping the Fund's volatility and downside risk below that of major equity market indices.

Strategy: To seek the Fund's objective, the Fund's subadvisor, Price Capital Management, Inc., uses a flexible investment approach that emphasizes capital preservation, but allows the portfolio managers to adopt a less conservative posture and to increase emphasis on capital appreciation when they believe the additional risk is warranted by favorable market conditions. The subadvisor invests long-or-short primarily in stocks, bonds and commodities using the subadvisor's technical and risk control strategies.

The subadvisor's technical strategy is based on a form of technical analysis known as "chart analysis" that attempts to invest in up-trending assets that are expected to produce above average risk-adjusted returns. Up-trending assets are those with generally rising prices and down-trending assets are those with generally falling prices. The subadvisor also uses this technique to take short positions in down-trending assets.

The principal risks of investing in the OnTrack Core Fund are Risks of the Subadvisor's Investment Strategy, Risks of Aggressive Investment Techniques, High Portfolio Turnover, Risk of Investing in Derivatives, Risks of Investing in ETFs, Risks of Investing in Other Investment Companies, Swap Agreement Risks, Risk of Asset-Backed Securities, Leverage Risk, Risks of Shorting Securities, and Risk of Non-Diversification. For more information on the risks of the OnTrack Core Fund, including a description of each risk, please review the prospectus carefully.

There is no guarantee that the OnTrack Core Fund will achieve its objectives. Investing in a mutual fund involves risk, including loss of principal.

Price Capital Management, Inc. serves as Investment Subadvisor to the OnTrack Core Fund, distributed by Ceros Financial Services, Inc. (member FINRA/SIPC). Ceros Financial Services, Inc. and Price Capital Management, Inc. are not affiliated entities. Advisors Preferred, LLC is the Fund's Investment Advisor. Advisors Preferred, LLC is a wholly-owned subsidiary of Ceros Financial Services, Inc.

Market indexes. Market indexes are included for comparative purposes only and should be used solely as context reflecting conditions in the general market or specific sector. The Fund does not seek to replicate - and can be expected to differ materially from - the composition, performance or volatility of any such index. Accordingly, no representation is made that the Fund's composition, performance or volatility are intended to track or otherwise be similar to any such index. It is not possible to invest directly in any index

S&P 500 Index: The Standard and Poors 500 Index is a capitalization weighted index of 500 stocks representing all major domestic industry groups.

NYSE Composite Index: The NYSE Composite Index (^NYA) is a stock market index covering all common stocks listed on the New York Stock Exchange, including American Depository Receipts, real estate investment trusts, tracking stocks, and foreign listings.

Barclays Capital Aggregate Bond Index: The Barclays Capital Aggregate Bond Index provides a measure of the performance of the United States dollar denominated investment grade bond market, which includes investment grade government bonds, investment grade corporate bonds, mortgage pass through securities, commercial mortgage-backed securities and asset backed securities that are publicly for sale in the United States.

Dow Jones Industrial Average: The Dow Jones Industrial Average is a price-weighted average of 30 significant stocks traded on the New York Stock Exchange and NASDAQ.

Russell 2000 Index: Russell 2000 is the Russell 2000® Index, which is a total return index comprised of the smallest 2000 companies in the Russell 3000 Index, representing approximately 11% of the Russell 3000 total market capitalization.

NASDAQ Composite Index: The NASDAQ Composite Index is a market-value weighted price return index measuring all NASDAQ domestic and non-U.S. based common stocks listed in the NASDAQ Stock Market.

Merrill Lynch High Yield Master II Bond Index: The Bank of America Merrill Lynch US High Yield Index tracks the performance of short-term US dollar denominated below investment grade corporate debt publicly issued in the US domestic market.

Disclosures (continued)

© 2022 Morningstar, Inc. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three, five, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

FUND PERFORMANCE

As of September 30, 2022

	QTR	YTD	1 Year	3 Year	5 Year	Since Inception*
OTRFX	-1.82%	-5.74%	-6.80%	8.89%	5.32%	4.41%
