

OnTrack Core Fund Note 26-08-31

Prepared by Lee Harris on 08/31/2026. Data from 8/28/2026.

SYMBOL (OTRFX/OTRGX)

S&P 500 Index

Stocks continued to advance during August, with the S&P 500 remaining in a healthy long-term uptrend despite periodic volatility. Market breadth remains generally constructive, although geopolitical uncertainty, inflation, and interest rates continue to warrant attention. As we enter September and October, historically a challenging period for stocks, it is an appropriate time to revisit one of our most important investment principles—capital preservation.

The Importance of Capital Preservation

Capital preservation is an important part of long-term investment success. One reason is simple mathematics: as losses become larger, the gains required to recover those losses increase dramatically.

Amount of decline	Gain required just to breakeven
8%	9%
25%	33%
50%	100%
75%	300%
90%	900%

For example, a \$100,000 portfolio that declines 50% is reduced to \$50,000. A 100% return on the remaining \$50,000 is then required just to restore the portfolio to its original \$100,000 value.

Large market declines are not merely theoretical. The S&P 500 Index declined 56.8% during the 2007–2009 bear market, while the technology-heavy Nasdaq-100 Index lost more than 80% following the bursting of the technology bubble from 2000–2002. More recently, the S&P 500 experienced a drawdown of approximately 19% earlier this year before recovering.

Avoiding every market decline is neither possible nor our objective. Instead, the OnTrack Core Fund seeks to manage risk and reduce exposure when market trends deteriorate, with the goal of limiting the potentially life-changing losses that can occur during major bear markets. By preserving capital during difficult periods, investors retain more of their assets to participate when favorable market trends return.

Any performance quotes represent past performance. Past performance does not guarantee future results. Investment return and principal will fluctuate, so that shares, when redeemed may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted and assumes the reinvestment of any dividend and capital gains distributions.

The contents of this OnTrack Core Fund Note do not constitute an offer to sell or a solicitation to buy a security, and are not an offer to provide any specific investment advice. Securities held in the OnTrack Core Fund are subject to change without notice. Advisors Preferred contact info: 888-572-8868; Email: bhumphrey@advisorspreferred.com. Most data and charts are provided by www.fasttrack.com and www.worden.com.

Disclosures

Objective: The OnTrack Core Fund seeks total return while keeping the Fund's volatility and downside risk below that of major equity market indices.

Strategy: To seek the Fund's objective, the Fund's subadvisor, Price Capital Management, Inc., uses a flexible investment approach that emphasizes capital preservation, but allows the portfolio managers to adopt a less conservative posture and to increase emphasis on capital appreciation when they believe the additional risk is warranted by favorable market conditions. The subadvisor invests long-or-short primarily in stocks, bonds and commodities using the subadvisor's technical and risk control strategies.

The subadvisor's technical strategy is based on a form of technical analysis known as "chart analysis" that attempts to invest in up-trending assets that are expected to produce above average risk-adjusted returns. Up-trending assets are those with generally rising prices and down-trending assets are those with generally falling prices. The subadvisor also uses this technique to take short positions in down-trending assets.

Some risks of investing in the OnTrack Core Fund are: Risks of the Subadvisor's Investment Strategy, Management Risk, Bond Risk, Commodity Risk, Derivatives Risk, Emerging Market Risk, Equity Risk, Foreign Investment Risk, Leverage Risk, Market Risk, Municipal Securities Risk, Mortgage-Backed Security Risk, Mutual Fund Risk, and Short Position Risk. For more information on the risks of the OnTrack Core Fund, including a full list of risks and a description of each risk, please review the prospectus carefully.

There is no guarantee that the OnTrack Core Fund will achieve its objectives. Investing in a mutual fund involves risk, including loss of principal.

Price Capital Management, Inc. serves as Investment Subadvisor to the OnTrack Core Fund, distributed by Ceros Financial Services, Inc. (member FINRA/SIPC). Ceros Financial Services, Inc. and Price Capital Management, Inc. are not affiliated entities. Advisors Preferred, LLC is the Fund's Investment Advisor. Advisors Preferred, LLC is a wholly-owned subsidiary of Ceros Financial Services, Inc.

Market indexes. Market indexes are included for comparative purposes only and should be used solely as context reflecting conditions in the general market or specific sector. The Fund does not seek to replicate - and can be expected to differ materially from - the composition, performance or volatility of any such index. Accordingly, no representation is made that the Fund's composition, performance or volatility are intended to track or otherwise be similar to any such index. It is not possible to invest directly in any index.

S&P 500 Total Return Index: The S&P 500 Total Return Index is an unmanaged composite of 500 large capitalization companies and includes the reinvestment of dividends. This index is widely used by professional investors as a performance benchmark for large-cap stocks. Investors cannot invest directly in an index.

NYSE Composite Index: The NYSE Composite Index (^NYA) is a stock market index covering all common stocks listed on the New York Stock Exchange, including American Depositary Receipts, real estate investment trusts, tracking stocks, and foreign listings. Investors cannot invest directly in an index.

Bloomberg U.S. Aggregate Bond Index: The Bloomberg U.S. Aggregate Bond Index is an unmanaged index comprised of U.S. investment grade, fixed market securities, including government agency, corporate and mortgage-backed securities. Investors cannot invest directly in an index.

Dow Jones Industrial Average: The Dow Jones Industrial Average is a price-weighted average of 30 significant stocks traded on the New York Stock Exchange and NASDAQ. Investors cannot invest directly in an index.

Russell 2000 Index: Russell 2000 is the Russell 2000® Index, which is a total return index comprised of the smallest 2000 companies in the Russell 3000 Index, representing approximately 11% of the Russell 3000 total market capitalization. Investors cannot invest directly in an index.

NASDAQ Composite Index: The NASDAQ Composite Index is a market-value weighted price return index measuring all NASDAQ domestic and non-U.S. based common stocks listed in the NASDAQ Stock Market. Investors cannot invest directly in an index.

Disclosures (continued)

Merrill Lynch High Yield Master II Bond Index: The Bank of America Merrill Lynch US High Yield Index tracks the performance of short-term US dollar denominated below investment grade corporate debt publicly issued in the US domestic market. Investors cannot invest directly in an index.

S&P U.S. Preferred Stock Index: The S&P U.S. Preferred Stock Index is designed to measure the performance of the U.S. preferred stock market. Preferred stocks pay dividends at a specified rate and receive preference over common stocks in terms of dividend payments and liquidation of assets. Investors cannot invest directly in an index.

Bloomberg 1-3 Month U.S. Treasury Bill Index: The Bloomberg 1-3 Month U.S. Treasury Bill Index includes all publicly issued U.S. Treasury Bills that have a remaining maturity of less than 3 months and more than 1 month, are rated investment grade, and have \$250 million or more of outstanding face value. Investors cannot invest directly in an index.

Disclosures (continued)

© 2026 Morningstar, Inc. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three, five, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10- year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

FUND PERFORMANCE

As of June 30, 2026

	QTR	YTD	1 Year	3 Year	5 Year	10 Year
OTRFX	1.81%	5.04%	10.28%	6.12%	1.87%	5.34%
